

Many of you are asking how the new Oregon restrictions are going to affect your appointments moving forward.

Luckily, we're still able to treat our patients as we have been since June. All of the protective measures we have in place go above and beyond what the CDC and OHA require. The new Oregon restrictions have not affected patient care at this time and we feel very confident in the safety measures we're taking to keep all of you safe.

We'll have you wait in the hallway at a distance of greater than 6' from others.

Masks are required, worn over your nose and mouth.

Our air is being cleaned by 10 new HEPA filtration devices as well as disinfectant fogging after each patient.

Patients coming in for any procedures requiring us to generate aerosols must be tested for COVID-19 3 days prior to the appointment with a PCR test. No rapid test results will be accepted as they are fairly unreliable.

Of course, we do ask screening questions prior to entry. If any patients have symptoms of being sick, or have engaged in high risk activities, we will kindly ask that they reschedule their appointments for at least 2 weeks out.

It is our duty to keep our vulnerable patients safe so we're asking for everyone's understanding and compliance with our safety measures. Our patients and our local hospitals, doctors, nurses and support staff thank you for helping to slow the spread of this virus.

If you have any questions, please don't hesitate to call, text or email our office.

Wishing everyone a safe holiday season,

***The Team at Eugene Dental Group***
